KL Software Technologies Inc. ("KLST") has a requirement for a few SharePoint Architects to work on a specific engagement with our key United States & Australian client(s).

The SharePoint Architect will be responsible for design and development of software solutions based on Microsoft SharePoint 2013 / 2016 / Online, Angular2, JQuery, REST API and .Net Framework.

Major responsibilities include:

- Excellent team leader – Ability to lead an International team of Microsoft certified SharePoint Technology Specialists on projects.
- Understanding client requirements by participating in workshops and regular client meetings.
- Architect, Design and Assess Technical Feasibility and prepare Out-Of-Box vs. Custom Development matrix
- Scoping and estimation of work effort of each requirement
- Create Technical Design, and Implementation Plan for the SharePoint solution
- Work with both offshore and onshore (US) MVP level technical resources (if applicable) on the Solution build
- Participate in Quality Assurance (UAT) process and resolve issues as they arise
- Support development of Microsoft SharePoint 2013 / 2016 / Online, Angular, JQuery, .NET framework, and business applications

Skills required:

- Strong verbal and written communications skills.
- 10+ years in Architecture, Design and Development of web applications based on Microsoft SharePoint 2013, Angular, JQuery, REST API, Search and Business Connectivity Services (BCS)
- Strong SharePoint Designer 2013 skills (especially creating External Content Types)
- Strong JQuery knowledge with .NET 3.5 / 4.0 programming skills.
- SharePoint 2013 / 2016 / Online Remote Add-in Programming hosted on Azure (ability to write custom remote event handlers, create lists / content types / alerts via code, create features, understand SharePoint Client Object Model etc.).
- AngularJS 2.x or above experience
- SQL Server 2012 & 2016 commercial work experience and SQL Reporting Services knowledge
- SQL Server Reporting Services (SSRS) – should have built both simple and complex SSRS reports using data stored in SharePoint and custom LoB systems.

- Good understanding of software design patterns (Singleton, Factory Method, Builder etc.)
- Responsive Design, HTML5/CSS3 knowledge
- Experience creating sandbox solutions using Visual Studio.
- Excellent verbal and written skills with a strong work ethic and exceptional client relationship skills·
- Willing to Travel national or international on temporary and permanent assignments (United States, Australia, India)

The following would be a big advantage:
- Experience with OpenXML
- Experience with SQL Server Integration Services (SSIS) and Analysis Services (SSAS)
- Active US Business/Visitor/Working Visa (H1B, B1/B2 visa etc.)
- Open to short periods of travel to USA, UK or Australia
- Business Knowledge - Demonstrate analytical and problem solving skills using knowledge, experience and understanding of Legal Vertical in the United States
- Experience integrating with ERP systems (like SAP) and CRM systems (like Salesforce.com / Microsoft CRM).
- Microsoft MVP Certification preferred
- Microsoft Certified Technology Specialist / MCTS (SharePoint) preferred
